

# UNDERSTAND INFORMATION FOR DISINFECTANTS

The COVID-19 pandemic brings the role of the Environmental Protection Agency (EPA) into focus.

## THE MISSION OF THE EPA

- Protect human health and the environment

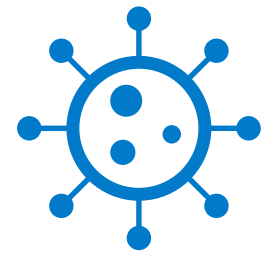

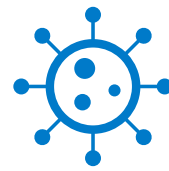

## THE EPA

- Registers disinfectants for efficacy and safety
- Regulates all aspects of testing, registering, labeling, and marketing of surface sanitizers and disinfectants

## THE EPA'S LIST N

Approved disinfectant products that kill the COVID-19 virus when used as directed.

**21** SPARTAN DISINFECTANTS ARE INCLUDED ON LIST N

## PRODUCT INFORMATION

### PRODUCT LABEL

Always follow the label!

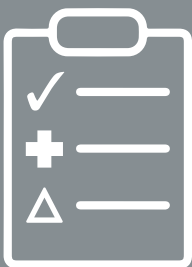

- EPA registration number ensures products are tested and approved to kill the listed organisms
- Wear gloves or other label-recommended PPE
- Follow dilution instructions to ensure correct potency
- To ensure efficacy, be sure surface remains wet for the contact time listed on the label
- Apply disinfectants only as directed on the label. If an application is not included (spraying, immersion, or fogging), then don't use it!

### SAFETY DATA SHEETS

SDSs explain the hazards, precautions, and response actions for a particular disinfectant and detail proper medical or first aid treatments, should overexposure occur.

- Employers must ensure that SDSs are readily accessible to employees for all hazardous chemicals in their workplace.

#### SDS INFORMATION INCLUDES:

- A product's physical and chemical properties
- Hazards identification, first aid measures, and handling, storage and transport information

### EFFICACY BULLETINS

- Describe the tests performed by the manufacturer to register the product with the EPA
- List the product's efficacy as a disinfectant or sanitizer
- List the organisms that the product kills, with contact time and dilution for complete efficacy
